## Agriculture Talk

### Future agricultural manager in the making...

Helen Day is currently studying Agricultural Management at Bridgewater College. The course is part time and Helen attends two days a week. Helen very kindly gave a talk at our rotary meeting on the 19th February about the course and her achievements so far. As part of Helen's coursework assignment the group of 25 students were asked to devise a business plan on how to run a farm. Helen was the best in her group and was put forward for a Pinnacle Award competing against other students, some of whom were at university level. Helen came 3rd and received her award from NFU President Peter Kendall.

## Good News

**To all of my 'older friends'.  
Not sure if it is true but maybe  
it will make you feel better .....**

Older people do not decline mentally with age, it just takes them longer to recall facts because they have more information in their brains, scientists believe.

Much like a computer struggles as the hard drive gets full up, so too do humans take longer to access information, it has been suggested.

Researchers say this slowing down it is not the same as cognitive decline.

"The human brain works slower in old age," said Dr. Michael Ramscar, "but only because we have stored more information over time".

"The brains of older people do not get weak. On the contrary, they simply know more."

**SO THERE!! We Are All Brilliant, just a bit mixed up?**

*President Chris*

## Future Contributors

The rotary bulletin is sometimes a bit thin on the ground with content. Please feel free to contribute articles to the bulletin ..... factual pieces or comical sketches are always welcome. Editorial can be sent via email to myself at [gemmalain@yahoo.co.uk](mailto:gemmalain@yahoo.co.uk) or dropped into my house at Morley Cottage, South Street, Braunton.
